PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience in IT support, workstation setup, account access troubleshooting, and day-to-day issue resolution. Practical exposure to software, hardware, network connectivity, and Google Workspace support, with a focus on keeping systems stable and users productive. Bachelor of Engineering background supporting technical problem-solving, structured troubleshooting, and clear handoff of issues through to resolution.

WORK EXPERIENCE

IT Executive & Administration

Sep 2024 – Present

Trident Design and Contract | PAN India

- Configured and maintained workstations, printers, and network routers across multiple client sites, applying TCP/IP and DNS fundamentals to keep office networks running without interruption.
- Set up VPNs, firewalls, and VLANs to secure remote access and segment traffic on LAN/WAN infrastructure for a high-profile company website.
- Managed user accounts, password resets, and email access for staff across PAN India locations, cutting downtime during account and access issues.
- Administered cloud infrastructure in Microsoft 365, handling domain settings and cloud storage for daily operations.
- Built and maintained internal web pages with HTML5 and CSS3 to support office documentation and reporting.
- Diagnosed and resolved hardware and software issues on short notice, keeping staff productive during peak operational periods.

Software Associate Intern

Jun 2024 – Aug 2024

Notion Press | Bangalore

- Designed and deployed Canvas and Model-driven apps in **Microsoft Power Apps** to automate internal business workflows.
- Built end-to-end automated processes with **Power Automate**, removing manual steps from contractual and operational work.
- Ran requirements analysis with cross-functional teams and translated findings into functional digital tools for client contracts and internal administration.
- Configured **Dataaverse** and **SharePoint** connectors to keep data storage secure and reporting accurate across systems.
- Applied UI/UX design principles to refine app interfaces based on user feedback, improving system reliability and task efficiency.

TECHNICAL SKILLS

Programming & Web

C#, Python, JavaScript, SQL, ASP.NET, React.js, HTML5, CSS3, SQL Server, MySQL

Networking

TCP/IP, DNS, VPNs, Firewalls, VLANs, LAN/WAN Architecture

Cloud & DevOps

AWS, Google Cloud (Vertex AI), Docker, GitLab

AI & Tools

Generative AI, GitHub Copilot, Gemini CLI, Claude

NOTABLE ACHIEVEMENTS

- Secured a Top 10 position in the national-level HACK THE METAVERSE hackathon hosted by IIIT Bangalore and IEEE Computer Society, Bangalore Section.
- Advanced to the final rounds of the Niveus Solutions 24-hour hackathon (NIVHACK 2023), selected among 25 out of 103 competing teams.
- Selected for the final rounds of the SMART NITTE HACKATHON, a 24-hour hackathon organized by NMAMIT Institute of Technology, out of 124 teams.
- Qualified for the final rounds of the ACCS Design Challenge 2023 (ADC 2023) after advancing through the semi-finals held at Maker's Village, Kochi.

PROJECTS (ACADEMIC & PERSONAL)

- **Muslim Verse:** An all-encompassing website with 114 Surahs, Duas, and essential resources for Muslims — muslimverse.netlify.app
- **Lab Programs:** A one-stop platform featuring an extensive collection of lab programs across all semesters for easy student access — labprograms.netlify.app
- **DEVCOM – Q&A for Developers:** Scalable web application built with Flask and PHP; MySQL backend with user authentication, search, and real-time updates; implemented a hate-speech recognition function to identify and mitigate unwanted content.

EDUCATION

Bachelor of Engineering (BE)

Visvesvaraya Technological University (VTU),
Computer Science Engineering, Karnataka · 2020 – 2024
CGPA: 7.8
